Hioneer Hi-Bred International, Inc.

LOTERS, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

PROTECTION FOR AN ALLEGED DISTINCT VARIETY OF SEXUALLY AN APPLICATION REQUESTING A CERTIFICATE OF REPRODUCED, OR TUBER PROPAGATED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) adjudged to be entitled to a certificate of plant variety protection under the ${
m LAW}$.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF TWENTY YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, CONDITIONING IT FOR PROPAGATION, OR STOCKING IT FOR ANY OF THE ABOVE PURPOSE, OR USING IT IN icing a hybrid or different variety therefrom, to the extent provided by the PLANT VARIETY TTION Λ CT. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

CORN, FIELD

'PH2N0'

In Testimon Thereof, I have hereunto set my hand and caused the seal of the Hant Hariety Protection Office to be affixed at the City of Washington, D.C. this sixth day of November, in the year two thousand one.

INSTRUCTIONS

GENERAL: To be effectively filed with the Plant Variety protection Office (PVPO). ALL of the following items must be received in the PVPO: (1) Completed application form signed by the owner. (2) completed Exhibits A,B,C,E; (3) for a seed reproduced variety at least 2,500 viable untreated seeds, for a hybrid variety sy Irsdy 2,500 untreated seeds of each line necessary to reproduce the variety, or for tuber reproduced varieties verification that a viable (in the sense (5300 filing fee and \$2,150 examination fee), payable to Treasurer of the United States* (See Section 97.6 of the Regulations and Rules of Practice.) Partial applications will be held in the PVPO for not more than 90 days, then returned to the applicant as unfilled. Mail application and other requirements to Plant on the face of the application on 500, NAL Building, 10301 Baltimore veheure, Beltsville, MD 20705-2351. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initiated and dated. DO NOT use masking materials to make corrections. If a certificate is allowed, you will be requested to send a check payable to Treasurer of the United States* in the amount of \$300 for issuance of the certificate. Certificates will be issued to owner, not licensee or agent.

Plant Variety Protection Office Telephone: (301)504-5518 FAX: (301)504-5291

Homepage: http://www.ams.usda.gov/science/pvp.htm

ITEM

Give: 18a.

- (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method;
 - the details of subsequent stages of selection and multiplication;
- evidence of uniformity and stability; and
- (4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified.
- Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other 18b. varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:
 - (1) identify these varieties and state all differences objectively;
 - attach statistical data for characters expressed numerically and demonstrate that these are clear differences; and
 - submit, if helpful, seed and plant specimens of photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- Exhibit C forms are available from the PVPO for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely 18c. as possible to describe your variety.
- 18d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant disease
- 18e. Section 52(5) of the Act required applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is
- If "Yes" is specified (seed of this variety be sold by variety name only, as a class of certified seed), the applicant may NOT reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, applicant may change the choice. (See Regulations and Rules of Practice, Section 7.103). 19.
- 22. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
- 23. See Section 5.5 of the Act for instructions on claiming the benefit of an earlier filling date.
- CONTINUED FROM FRONT (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the 22 variety (Including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other
- 23. CONTINUED FROM FRONT (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).

NOTES: It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. There is no charge for filling a change of address. The fee for filling a change of ownership or assignment or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of Regulations and Rules of Practice.)

To avoid conflict with other variety names in use, the applicant should check the variety names proposed by contacting: Seed Branch, AMS, USDA, Room 213, Building 306, Beltsville Agricultural Research Center-East, Beltsville, MD 20705. Telephone: (301) 504-8089.

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instruction, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate of any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, CIRM, AG Box 7530, 1 are L. Whitten Building, Washington, D.C. 20250. When replying, refer to OMB No. 0581-0035 and form number in your letter. Under the PRA of 1995, no persons are required to respond to a collection of information unless it displays a valid CMB control number. The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, see, disability, postical beliefs, and mental or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require attentions for communication of program information (braile, large print, auditations, etc.) should contact the USDA Office of Communications at (202) 720-2791. To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TOD). USDA is an equal employment opportunity employer.

Exhibit A. Origin and Breeding History

Pedigree: PHGG6/PHBE2)X64141X

į

Pioneer Line PH2N0, Zea mays L., a dent com inbred, was developed by Pioneer Hi-Bred International, Inc. from the single cross hybrid PHGG6 X PHBE2 (PVP Certificate No. 9500200) using the pedigree method of plant breeding. Varieties PHGG6 and PHBE2 are proprietary inbred lines of Pioneer Hi-Bred International, Inc. Selfing and selection were practiced within the segregating population from the above hybrid for 7 generations using pedigree selection. During line development, crosses were made to inbred testers for the purpose of estimating the line's combining ability. Yield trials were grown at Princeton, Illinois as well as other United States Pioneer research locations. After initial testing, additional hybrid combinations have been evaluated and subsequent generations of the line have been grown and hand-pollinated with observations again made for uniformity.

Variety PHGG6 was derived by pedigree selection from a single cross hybrid PHPO2 (PVP Certificate No. 8800212) X PHR03 (PVP Certificate No. 9100097).

Variety PH2N0 has shown uniformity and stability for all traits as described in Exhibit C - "Objective Description of Variety". It has been self-pollinated and ear-rowed 5 generations with careful attention paid to selection criteria and uniformity of plant type to assure genetic homozygousity and phenotypic stability. The line has been increased both by hand and in isolated fields with continued observations for uniformity and stability for a minimum of 3 generations during the final stages of inbred development and seed multiplication. Very high standards for genetic purity have been established morphologically using field observations and electrophoretically using sound lab molecular marker methodology.

No variant traits have been observed or are expected in PH2NO.

The criteria used in the selection of PH2N0 were yield, both per se and in hybrid combinations; late season plant health, seedling vigor, grain quality, stalk lodging resistance, and kernel size, especially important in production. Other selection criteria include: ability to germinate in adverse conditions; number of tillers, especially important in production because having numerous tillers increases hybrid production costs spent on detasseling; disease and insect resistance; pollen yield and tassel size.

Exhibit A: Developmental history for PH2N0

Season/Year Pedigree Grown	Inbreeding Level of Pedigree Grown

Ĺ	Bulk increase

^{*}PH2N0 was selfed and ear-rowed from F3 through F7 generation.
#Uniformity and stability were established from F6 through F8 generation and beyond when seed supplies were increased.

Exhibit B. Novelty Statement

Variety PH2N0 mostly resembles Pioneer Hi-Bred International, Inc. proprietary inbred line PHR03 (PVP Certificate No. 9100097). The data in Tables 1A and 1B are from paired comparisons collected primarily in Johnston and Ankeny, IA. The traits collectively show measurable differences between the two varieties.

Variety PH2N0 has less leaves per plant (17.0 vs 19.7) than PHR03 (Table 1A, 1B).

Variety PH2N0 has a lower tassel floret density per 4 cm (11.8 pairs per 4 cm vs 17.3 pairs per 4 cm) than PHR03 (Table 1A, 1B).

. Variety PH2N0 has longer tassel length (64.9 cm vs 55.2 cm) than PHR03 (Table 1A, 1B).

A t-test was used to compare differences between means and the appropriate parameters have been included.

Exhibit B Novelty Statement Tables

Table 1A. These data Indicate differences between varieties PH2N0 and PHR03. Data are from Johnston and Ankeny, Iowa at 2 different locations in 1997 and 3 locations in 1998. A t-test was used to compare differences between means. Five plants were measured at each location.

CLARIFICATION OF DATA IN EXHIBITS B AND C

Please note the data presented in Exhibit C, "Objective Description of Variety," are collected primarily at Johnston and Ankeny, Iowa. The data in Exhibit B are from comparisons of inbreds grown in the same tests in the adapted growing area of PH2N0 and in Johnston and Ankeny, Iowa. The data in Tables 1A and 1B are from paired comparisons collected in Johnston and Ankeny, Iowa. These traits collectively show distinct differences between the two varieties.

1, 3: 4

The data collected in exhibit C were collected in 1997 and 1998 for page 1 and 2. There are environmental factors that differ from year to year and environment to environment. The environments had different planting dates within each year. Environmental temperature and precipitation differences during the vegetative and grain fill periods can impact plant and grain traits and be a source of variability. These data are mostly based on 5 plants measured at each location. There often is more variability associated with year to year factors than from location to location or within locations. Please see Table 3 for average temperature and rainfall information in 1997 and 1998.

Table 3. Temperature and Rainfall

TEMPERATURE

YEAR	MAY	JUN	JULY	AUG	AVERAGE
1994	59.8	70.7	71.9	69.0	67.9
